When care and attention become a profession, the result is
always astounding! And so, after 27 years of experiences
and hard work in the field of constructions, we proceeded to
establish **"Georgios M. Giaglis Technical Contracting
SA"**. With knowledge as our main business asset, and
always keeping organisation, quality, consistency and
safety as our top priorities, we have carved ourselves a
dynamic path into the construction sector.

Our company's perfectly equipped and specialised
workforce are always eager to listen to you, give you advice
and propose the most effective, functional and economical
solutions. We make sure that our employees are being
informed about all the latest techniques and about the most
up-to-date materials that can be used in the constructional
field.

Η Φαντασία, η δημιουργία και η ασφάλεια των κατασκευών είναι αλληλένδετα με την εταιρεία μας

The Imagination, creativity and safety of our constructions are crucial to our company

A collage of five images showing different types of facilities. The top-left image shows the interior of a wooden sauna with a wooden bench and a bucket. The top-right image shows a computer lab with multiple desks and computers. The bottom-left image shows an electrical control room with two large monitors and a complex wiring system. The bottom-right image shows an outdoor sports field with a green artificial turf and a surrounding fence.

Our company, always baste in European standards, has created **"Kirki UG"**, a subsidiary company in Central Europe (Germany) with main activity services, calorific design and all the latest constructions.

Χρόνο με το χρόνο, οι δραστηριότητες μας αυξάνονται σε πολλούς επιχειρηματικούς τομείς. Οι εταιρείες μας, με απόλυτη επιτυχία και χωρίς το παραμικρό παράπτωμα, έχουν δραστηριοποιηθεί ως τώρα στον κατασκευαστικό τομέα με:

Year on year, we expand our activities in many business sectors. To date, our companies have been perfectly successful, without even the smallest mistake, in their activities in the construction sector, including:

• Private works:

- Construction of residences – all kind of renovation
- Integrated cooling – heating system installations
- Transformation of surrounding areas
- Sports facilities of any kind
- Swimming pools as well as special facilities for spas
- Fibre optic networks
- Construction of concert halls to European standards
- Hotel facilities
- Construction of industrial buildings
- All kinds of university facilities
- Construction of cultural centres
- Electrical and mechanical engineering facilities
- Renovation – preservation works on bank buildings

Public works:

- Construction of all kinds of sports grounds
- Construction of school buildings
- Construction of nursery schools
- Restoration of listed buildings
- Roadworks
- Electrical and mechanical engineering facilities
- Construction of retirement homes
- Integrated cooling – heating system installations
- Transformation of surrounding areas

With the appropriate specialised and scientific workforce, and in collaboration with external partners (both within Greece and abroad), **we are able to prepare and carry out studies such as:**

- Energy designs for buildings
- Environmental impact studies
- Studies of development laws
- Investment schemes – financing for projects
- Studies into renewable energy sources
- Waste treatment and recycling facilities
- Organic farming and biofuels
- Investments into product standardisation
- Imports – representatives for specialised equipment.

We proceed always with the most up-to-date materials, **based on the latest European standards.** Cause of the commercial activity of our company, we can import a great amount of materials from around the world. The cooperation with companies known all around the world, we can make possible everything that our competitors can not.

A decorative graphic consisting of a 2x3 grid of colored squares. The top row has a yellow square, a blue square, and a yellow square. The bottom row has a white square, a yellow square, and a blue square.

The team of our company, has unique knowledge on the Sustainable Systems and can create, construct and find the right solution in these latest's technological systems. The continuous education of our team in these systems is a bet that we keep winning.

Ecosystem services value
Billion of US dollars per year
